

CRITICAL INCIDENT REPORT PLATFORM OUTAGE AND DATA LOSS

Report ID: IR-TECHVENTURE-2026-04-28

Prepared by: TechVenture IT and Operations

Date: April 28, 2026

Incident Classification: P1 CRITICAL Confirmed Data Loss

Incident Summary

On April 26, 2026 at 14:20, TechVenture's CloudAxis ERP platform became unavailable. CloudAxis confirmed on April 27 at 09:15 that the outage was caused by a failed infrastructure migration that was not disclosed to TechVenture in advance. CloudAxis further confirmed on April 28 at 11:00 that approximately 72 hours of incremental backup data was not recoverable due to a snapshot error during the migration.

Timeline

- April 26, 14:20: Platform access lost TechVenture staff report login failure
- April 26, 14:35: P1 ticket opened with CloudAxis helpdesk
- April 26, 15:10: CloudAxis acknowledged ticket, stated investigating
- April 26, 18:45: CloudAxis identified root cause as infrastructure migration
- April 26, 18:45: TechVenture notified for first time about the migration
- April 27, 09:15: CloudAxis confirmed unplanned migration triggered the outage
- April 27, 22:00: Partial platform access restored for read-only operations
- April 28, 11:00: CloudAxis confirmed backup snapshot error causing data loss
- April 28, 14:00: Full platform access restored but data gap confirmed

Data Loss Impact

- Affected period: April 25, 14:00 to April 26, 14:00 (approx. 24 hours of data)
- Modules affected: payroll entries, customer orders, financial postings
- Payroll batch processing for April 25 requires full re-entry
- 847 customer transaction records may need manual reconciliation
- 3 financial postings for April 25 are unrecoverable from CloudAxis backups

SLA Breach Analysis

- Platform was unavailable for approximately 23 hours 40 minutes
- SLA target: 99.7% monthly availability (max downtime ~2.2 hours per month)
- Actual April downtime to date: approximately 24 hours (critical SLA breach)
- P1 resolution SLA of 8 business hours was exceeded by approximately 14 hours
- Data RPO breach: confirmed 24+ hours data loss against 24-hour RPO commitment

Preliminary Business Impact

- Payroll team: 14 hours of manual re-entry work estimated
- Finance team: 3 unrecoverable postings require manual reconstruction
- Customer operations: 847 transaction records require reconciliation
- IT overtime: 31 hours of emergency response time logged
- Estimated internal response cost: 28,400 TND
