

PATIENT OPERATIONS IMPACT SUMMARY

Prepared by: MedCare Patient Operations

Date: March 31, 2026

Affected Services

The March 21 outage affected MRI scheduling at the Ariana clinic. Patients with urgent referrals were prioritized for rerouting to partner clinics.

Impact Figures

- Delayed appointments: 23
- Same-day external referrals: 9
- Cancelled appointments later rebooked: 4
- Patient complaints received by March 29: 7
- Direct external scan costs: 8,920 TND
- Estimated internal overtime cost: 1,480 TND

Customer Communications

Staff used approved disruption scripts. No patient diagnosis details were shared with BioServe. Two patients requested written explanations for insurance files.

Compliance Notes

No immediate patient injury was reported. Compliance recommends preserving all ticket records, service logs, patient scheduling records, and external clinic invoices. If downtime repeats in April, a regulator notification assessment may be needed.

Evidence Gaps

The summary estimates do not yet include reputational harm or lost future appointments. Legal should avoid overstating damages until finance support is complete.
