

MANAGEMENT CALL SUMMARY

Call date: April 6, 2026

Participants: MedCare CEO, MedCare Legal, BioServe Director, BioServe Service Lead

Prepared by: MedCare Legal

Main Discussion Points

MedCare stated that patient continuity and documentation gaps are the core concerns. BioServe repeated that it does not accept material breach, but accepted that the missing February service sheet is a documentation problem.

Agreed Action Items

- BioServe to provide raw telemetry export by April 7, 2026 at 18:00
- MedCare to send external scan invoices by April 8, 2026
- BioServe senior engineer visit scheduled for April 8, 2026 at 09:00
- Both sides to hold settlement call on April 9, 2026 at 15:00

Unresolved Issues

- Start time for SLA response clock remains disputed
- Amount of credit note remains disputed
- Whether payment of undisputed amount affects MedCare remedies remains sensitive

Settlement Signals

BioServe indicated possible flexibility up to 10,000 TND credit if MedCare pays by April 10. MedCare indicated it may accept enhanced monitoring if documentation controls become strict and measurable.

Legal Note

Future client communications should separate operational settlement language from admissions of breach or waiver of rights.
